EXPERIENCE

Full Stack Software Developer - Luminus Technology University College, (Mar 2022- Mar 2024).

- Contribute in backend and frontend.
- Modernized the website with a sleek, collage-style layout and improved visual appeal.
- Implemented responsive design to ensure optimal performance across all screen sizes.
- Added advanced program filters for easier and more intuitive navigation.
- Integrated a third-party email service for seamless email sending and receiving.
- Built a user-friendly backend using Django and Wagtail CMS, enabling non-technical staff to manage website content effortlessly.
- Collaborated with design/product teams to deliver user-friendly web apps.
- Led requirement-gathering meetings to ensure clear project goals.
- **Tech Used:** Python, Wagtail, JavaScript, PostgreSQL, AWS.

Teaching Assistant - Abdul Aziz Al Ghurair School of Advanced Computing, (Jul 2022 – Oct 2022).

- Support students in assignments, explained technical concepts, and guided final projects.
- Coordinate practice interviews.
- Delivered feedback to strengthen coding and soft skills using digital tools, such as: Zoom, Miro and Slack.
- Guided students toward relevant resources to enhance their understanding, strengthen their skills, and support independent learning.

PROJECTS

ASAC Website, (Jan 2024 - Mar 2024)

Created an informative website for the ASAC department and increase student inquiries. The website gave clearer details about the department's programs, which helped attract more applicants.

LTUC Website, (Mar 2022 - Jul 2023)

Developed a college website to deliver essential information for students, job seekers, and talented individuals.

TradeWheels, (Nov 2022 - Feb 2023) - [github](#)

Built a car marketplace with authentication, listings, filters, and email integration.
